

## FAQ: 0008: Purchase Requisition Entry

### 1. While taking print of purchase requisition memo, 'urgent requirement' is printed.

#### Reason:

If purchase requisition date and schedule date's difference is less than material master's procurement days, then while taking print of purchase requisition memo 'urgent requirement' is printed. Otherwise 'urgent requirement' is not printed.

It will not print 'urgent requirement' if procurement days are not entered.
