

FAQ_0042

Issue: After Oracle Installation and starting to install if there is error regarding Java.exe, what we should do? It doesn't allow us to install the forms/reports.

Solution: When you face this type of error,

- Go to My Computer→Control Panel→Administrative Tools→Services
- Find "Oracle HTTP Services" and turn the status from automatic to manual. To do this right click on oracle HTTP service, select properties and select "startup type" manual.
- After setting this restart the server.
