

FAQ_0059

Module: FmBatchCr (Batch Creation)

Issue: One Product's Residue required to enter in Other Product's batch for Two different Products (Generic name is same).

Solution: Suppose X & Y is two products and want to add residue of X product to Y product.

- 1- Add Packing detail of X-Product into Formula master of Y-Product.
- 2- Go to the Batch Creation and select X-Product then Entered the Qty in the Residue Qty.
- 3- Select Y-Product in Batch Creation and edit, then go to Residue Reused Detail, F9 in Batch , here we will get the X-product batch no., Qty. Select it and OK, it will show batch no. and RR Qty. In packing detail, Planned Qty must be equal to Batch Qty.+ R.R.Qty. then F10.
